Appendix: Uninteresting stuff

Appendices are for material that is needed for completeness but not sufficiently interesting to include in the main body of the paper. Most articles don't need any appendices, but feel free to use them when appropriate. This sample article needs an appendix only to illustrate how to create an appendix.

ACKNOWLEDGMENTS

We gratefully acknowledge Harvey Gould and Jan Tobochnik, who created an earlier AJP L^AT_EX sample article that inspired this one. This work was supported by the American Association of Physics Teachers.
